

## DataMax Group, Inc. Announces Release of Storeworks™ v3.04

*New release of DataMax's class leading small business back office solution provides inventory management enhancements, upgraded install and upgrade processes and improved POS NAXML™ support .*

Round Rock, TX - USA – September 26, 2008 – DataMax Group, Inc., one of the leading providers of global back office and home office solutions for the petroleum and convenience store industry, announced, today, the release of Storeworks™ v3.04. This update to DataMax's class leading small business back office solution adds enhancements to improve inventory management and operation with an optional new central price book application. Storeworks™ is a back office system primarily designed for the small single store user. Options for central reporting via Storeworks™ HQ and a completely rewritten central price book is available for store owners with more than one site.

In addition this new version of Storeworks™ has improved upgrade and install options and support for the PCATS™ NAXML™ 3.4 and 3.3 POS interface standards. This release now supports an interface to Intuit's QuickBooks™ 2008 edition and an upgrade to the interface to Sage's Peachtree™ small business accounting system.

Storeworks™ continues to grow with your business™ and provides a cost effective solution for the small convenience store business owner.
