

# Storeworks Central Price Book™

Set up and maintain your price book with ease. Apply global price and cost changes to products throughout all of your stores. Track and control promotions, combos, fastfood items and more.

## Key Features

**Product Management** – Set up and maintain all products in your price book, including regular products, combos, promotions and recipe products.

**Global Price and Cost Change** – Make a variety of price or cost changes for a selected range of products, stores, and vendors.

**Cost and Price Groups** – Additional product grouping methods for finer control over price management.

**Price Book Management** – Perform the initial price book import and setup. Manage the price book on a regular basis.

## Special Features

**Recipe Management** – Keep track of your in store product ingredients for making Hot Dogs, BLTs etc.

**Combos** – Individual items sold together at special prices are easily tracked and managed.

**Promotions** – Change prices for a short time without altering your base prices.

**Flexible Tagging** – Tag by Inventory Levels and by Corporate Levels.

**Easy access** – Use the **Zoom** feature to navigate effortlessly within the Central Price Book.

## More Features and Options

**Not for Sale Items** – Manage items used at the store with ease.

**At Retail PLU** – Keeping track of your complimentary items is made easy using the At Retail PLU feature.

**Manage multiple stores** – Using Central Price Book with Storeworks HQ you can efficiently track and control products and prices at all of your stores from a single location.
