

Storeworks HQ™

Manage all of your stores from a central location. Use Storeworks HQ to consolidate and analyze information for all of your stores. Headquarters reports can be run for individual stores, selected stores groups, or for your entire chain.

Key Features

Review Store Information – From cash balancing to fuel to price book. See exactly what your stores see.

Reports – Compare information across all stores and analyze your overall performance.

Adjustments Manager – Keep better track of inventory and invoice adjustments. Make adjustments at headquarters and export them to your stores.

Exceptions Manager – Define your own parameters to flag trouble spots as exceptions. Storeworks HQ alerts you when they occur.

Special Features

In-House Deli – Keep track of deli products and their ingredients as part of your inventory management.

Pool Margin – Make future sales and profit projections based on different levels of fuel pricing and sales volume.

Clone Stores – Use information from existing stores to add new stores to the system.

Store Recovery – In the rare event of catastrophic failure at a store, you can transfer complete store information from HQ, dramatically reducing downtime.

History Manager – Keep different information for different lengths of time e.g. 12 months of invoices, 3 months of fuel sales.

More Features and Options

System Scheduler – Schedule backups and system tasks to occur at regular intervals.

Accounting Export – Allow each store to export to their own accounting system or export your consolidated accounting information from HQ.

Central Price Book Option – You can add a central price book to HQ that will allow full control of your site price books from a central location. See separate brochure on this feature.
